Lakeshore Bank Landscaping Application

Applicants Name: _____

Date: _____

Address: _____

City: _____

Phone: _____

Chapter 165.22.10.J: Landscaping. Any request for landscaping, excavating, or vegetation removal requires a Lakeshore Landscaping Permit which is very strict in its requirements. There are only 2 two reasons landscaping permits on the lakeshore area are given. Please indicate which is happening:

- 1. Wave Action _____ 2. Surface Water Bank Erosion _____

If one of these is occurring a drawing prepared to scale by a registered civil engineer, a registered landscape architect, or the Dickinson County Soil Conservation District is to be submitted. The City of Wahpeton allows only natural looking rock retaining walls with natural vegetation cover. The area this applies to is from the ordinary high water mark to the 35' foot set back line.

The Zoning Administrator and the Board of Adjustment Chairman shall review the application and shall grant or deny the requested permit. If either officer does not approve the application, it shall be considered denied. If an application for a landscape permit is denied, that decision may be appealed to the Wahpeton Board of Adjustment.

To Be completed by a Registered Civil Engineer, Registered Landscape Architect or Dickinson County Soil Conservation Officer:

I/We certify that I/We have examined the above described lakeshore bank and have made a determination that a serious erosion problem exists or will exist on the lakeshore bank if corrective landscaping measures are not taken. A detailed drawing must be submitted with this application providing cross sections of proposed improvements with a side view, plan view, and elevation view. State briefly the erosion problem and what corrective measures will be taken and the materials to be used:

I/We further state that any corrective measures proposed in a plan submitted under Ordinance 165.22.10.J, shall minimize as far as possible, any change in the level in the finished surface of the ground to be landscaped and shall minimize permanent removal of vegetation or plant cover.

Engineer, Architect, or Soil Conservation Officer: _____
